THE STORY

It was midnight as Elf crept back to the dying embers of the fire, where earlier that evening the old black witch had been burnt along with her belongings. Everything had surely been destroyed, her potions, charms and spell books lay in ashes. Elf's heart was thumping as his eyes scoured the charred remains. There it was! The legend was true! The book of immortality could not be destroyed. Elf turned the pages of the ancient manuscript.

THE GAME

The object of the game is to collect four potion bottles and take them to their corresponding magic cauldron.

Falling into water or onto spikes will cause your premature death, as will coming into contact with the many different adversaries which roam the domain. Some enemy characters need weapons to destroy them, others are invincible. Elf starts his quest with only his trusty long bow and a quiver full of arrows.

On his quest Elf may find a number of useful weapons. These include additional arrows for his long bow, wooden staffs, stealth axes and the all powerful staff of destruction. Other objects include shields, health enhancing food and items of treasure.

After filling certain cauldrons the magic will effect the domain and strange changes may occur, walls may disintegrate or new lifts may be formed.
